Challenges with Exhaust Parts

STORAGE IS COMPLEX

- Lack of standardized packaging makes automated storage and retrieval systems difficult. Lost sales due to poor inventory visibility.

DIFFICULT HANDLING

- Maneuvering is cumbersome both in stores as well as in the shop. Parts can be damaged and people can get injured.

EXPENSIVE TRANSPORTATION

- Logistics costs are huge due to how bulky exhaust lines are. Transportation to the end customer is cost-prohibitive.

Start Saving Money with Easy2fit®

IMPROVE THE ENTIRE SUPPLY CHAIN

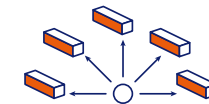

Receiving / Storage:
No more handling issues
Easy to scan and add to inventory
Saves storage space

Distribution:

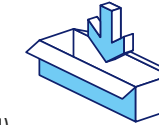

Increases cargo loads
Easier shipping and transportation
No product damage
